

Invertebrate survey: first sample (further sampling will be carried out)

The Sample

A sample was taken of the Latchmore Brook on 21 August 2013 to assess the invertebrate life forms present in the brook. In addition notes were taken about other river life forms.

Sample Details

Date of sample: 21 August 2013

Recorded by: Paul Rouse

Location: Latchmore Brook at SU 151 142 Ref 127190

EA predicted level – NOT SET

EA Trigger level - NOT SET

Target Species	Number
Cased caddis	
Caseless caddis	2
Mayfly (Ephemeridae)	
Blue Winged Olive (Ephemerellidae)	3
Flat bodied (Heptageniidae)	
Olives (Baetidae)	
Stoneflies	
Freshwater shrimp	51
Total	56

Noted Other Species	Number in sample
